PROFILE

Driven and detail-oriented DevOps Engineer with hands-on experience in artificial intelligence and machine learning, gained through internships. Proficient in cloud services, networking, Linux systems, and database management, with a strong command of Python programming. Recognized for effective problem-solving abilities and a commitment to delivering innovative solutions that enhance operational efficiency and accelerate technological advancements

WORK EXPERIENCE

DevOps Intern

Techsnapie Solutions

[27/05/2024]-Present

- Collaborated with software engineers to implement CI/CD pipelines, streamlining deployment and enhancing efficiency.
- Developed and maintained hosting using AWS, improving system scalability and reliability.
- Assisted in monitoring and optimizing system performance, troubleshooting issues in production environments.

AI/ML Intern

Nextlogic Solutions

[01/04/2024]-[02/05/2024]

- Contributed to AI and machine learning projects, including the development of a comment toxicity identifier using Python and ML models.
- Developed my first AIML project on Heart disease prediction .
- Assisted in designing and fine-tuning machine learning algorithms to accurately detect toxic comments in real-time.

PROJECTS

NFC-Based Attendance System

Developed an automated attendance tracking system using NFC technology, significantly improving accuracy and operational efficiency.

Library Management System Application

Created a comprehensive application to streamline library operations, enhancing both user experience and administrative workflows

AI Emotion-Based Attendance System

Designed an attendance system leveraging emotion recognition to improve engagement tracking in educational environments.

Shield Guard

Engineered a safety tool to promote adherence to health guidelines during the COVID-19 pandemic, boosting public awareness.

Comment Toxicity AI Model -In Progress

Developing a machine learning model to detect toxic comments, contributing to safer and more positive online interactions.
